

## **Asbestos Management Plan**

In 1986, Congress passed the Asbestos Hazard Emergency Response Act (AHERA). This law requires all schools, kindergarten through twelfth grade to be inspected for asbestos-containing building material and subsequently to develop a management plan. Our District management plan is available for your review in the District Office with a plan for each school available in each school's administrative office.

Our maintenance and custodial people have received training to enable them to conduct their routine activities around asbestos-containing material. Our systematic schedule of monitoring, employee training, record keeping and periodic re-inspections is an ongoing process.

Although asbestos-containing materials located in our facilities are monitored, a comprehensive periodic inspection is performed to determine and record any changes that may have occurred in the condition of the material. Documentation on these inspections can also be found in the management plan available in each building office.
